Bed Roller Extensions	Standard	Standard

The patented Eagle Tuf-Cut adds flexibility to your total tire cutting system by providing you the opportunities of accepting tires up to 23.5/25, 12 ply into your system.

The unit also allows your system to cut two or three tires at one time, yielding 50 - 60 truck tires per hour or approximately 2,000 lbs. of tires per hour.

The Tuf-Cut comes standard with a tire lift and extension rollers to handle the larger tires. The Tuf-Cut is available as a portable or stationary unit and can be powered by electric, diesel or gasoline.

Stationary Unit
